

Integral Blinds

The unique Integral blind system that offers protection from the heat and the glare of the sun within sealed double glazed units making them dust free. Uni-Blinds are assembled and permanently sealed within the double glazing cavity. Once sealed in this totally dust-free environment, the blinds require no cleaning, always appear new and are protected from damage.

They are available in venetian and pleated in a choice of colours, operated either by hand cord or electric.

Features:

- Clean for life
- Protection against deformation and damage by encapsulation
- Maintenance free
- Pristine appearance of blinds at all times
- No UV degradation
- Improved solar control
- Improved u-valves
- 12.5mm slat available in white, beige and silver as standard

Magnetic

The slat raising, lowering and tilting functions are achieved using a rotational magnetic transmission through the glass, guaranteeing

the units hermetic seal. The raising and lowering is achieved using a continuous cord loop that drives the external magnet.

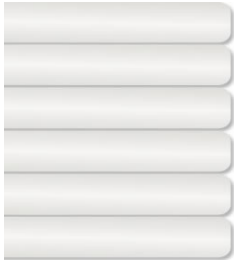

Electrical

An electrically operated system with numerous options is available. Please check feasibility for speed restrictions.
